Akash Jyoti Deka - Full Stack Development Portfolio

1. Real-Time Chat Application

Tech Stack: HTML, CSS, JavaScript, Django, MySQL

A web-based chat application supporting real-time messaging using Django Channels and WebSockets. Designed a responsive UI and implemented user authentication, message history, and live updates.

2. Music Freak - Music Streaming Platform

Tech Stack: React 18, Tailwind CSS, Firebase (Firestore), Cloudinary

Built a modern, responsive music streaming platform featuring dynamic playlists, audio uploads, and real-time data handling. Integrated Firebase for database and Cloudinary for media storage. Used React Router for seamless navigation.

3. Mass Mail Dispatcher Website

Tech Stack: HTML, CSS, JavaScript, Flask

Developed during internship at Exposys Datalabs. The tool automates bulk email sending with a clean and simple UI. Ensures reliable email delivery using SMTP and allows CSV upload for managing recipient lists.
